PROFESSIONAL SUMMARY

Certified AI-First Solution Architect with 10+ years of experience designing and deploying highly scalable, fault-tolerant enterprise systems across global cloud environments (GCP, AWS). Specialized in architecting Agentic AI workflows, RAG pipelines, and low-latency microservices that bridge advanced machine learning capabilities with measurable organizational ROI. Proven track record of reducing infrastructure costs by up to 35%, optimizing inference latency by 60%+, and leading teams to implement strict data privacy, RBAC, and Human-in-the-Loop (HITL) governance frameworks. Holder of elite 2026 credentials including the Claude Certified Architect — Foundations (Anthropic) and Microsoft Certified: Agentic AI Business Solutions Architect.

AI & AUTOMATION

- Agentic OS
- RAG (Retrieval-Augmented Generation)
- Vector Databases (Pinecone)
- LangChain
- LlamaIndex
- Model Fine-Tuning (LoRA)
- Prompt Engineering
- Anthropic / OpenAI APIs
- OpenAI

PERFORMANCE & MLOPS

- Rust (kornia-rs)
- Python (PyTorch)
- PyTorch
- Vertex AI
- TensorRT
- Model Drift Detection
- Inference Latency Optimization
- GPU Workload Shaping

CLOUD INFRASTRUCTURE

- GCP (Google Cloud Platform)
- AWS
- Kubernetes (GKE)
- Docker
- Anthos Service Mesh
- Istio
- Argo Workflows
- High Availability (HA)
- Disaster Recovery (DR)

BACKEND & INTEGRATION

- Node.js (NestJS, Fastify)
- TypeScript
- Event-Driven Architecture
- Cloud Pub/Sub
- RESTful APIs
- Semantic APIs

PROFESSIONAL

EXPERIENCE

01/2026 – Present
Ho Chi Minh City, Vietnam

Independent Research & Professional Development

AI-First Solution Architect

- Completed 200+ hours of intensive lab-based architectural design, securing 4 elite certifications (Anthropic CCA-F, Microsoft Agentic AI Architect, Fabric Analytics Engineer, AI Transformation Leader) within a 90-day sprint across GCP and Azure ecosystems.
- Architected production-grade RAG pipelines processing 50K+ document chunks with vector database integrations (Pinecone, Milvus), establishing standardized Human-in-the-Loop (HITL) safety patterns and Model Context Protocol (MCP) tool orchestration for enterprise LLM deployments.
- Designed end-to-end Agentic AI workflow blueprints incorporating FinOps cost governance, SOC 2-aligned data residency controls, and automated threat modeling—reducing projected cloud spend by 25% in simulation environments.

01/2023 – 11/2025
Ho Chi Minh City, Vietnam

CADDi

Senior Full Stack Engineer

- Engineered high-performance machine vision pipelines utilizing Rust (kornia-rs) and Python (PyTorch, OpenCV), powering patented similarity search algorithms that enabled real-time geometric analysis across a catalog of 3M+ complex manufacturing drawings.
- Architected fault-tolerant microservices on GCP (Kubernetes, Anthos Service Mesh), orchestrating event-driven data extraction from enterprise data lakes and achieving 99.95% uptime SLA across 12 production services.
- Optimized inference latency by 60% via TensorRT model optimization and strategic GPU workload shaping, driving a 35% reduction in annual GCP infrastructure costs (~$180K saved) through asynchronous processing pipelines (Cloud Pub/Sub).
- Led the migration to micro-frontends via Webpack Module Federation, reducing frontend build times by 40% while deploying secure AI context planes with Human-in-the-Loop (HITL) safety guardrails for responsible enterprise LLM integration.

09/2020 – 08/2022
Singapore

Kydon Group

Front End Lead

- Architected the core front-end infrastructure for an Agentic Learning OS, orchestrating multi-agent AI systems that dynamically generated personalized learning pathways for 10K+ concurrent enterprise learners with sub-200ms response times.
- Engineered secure semantic APIs linking LLM resource schedulers with enterprise knowledge bases via Model Context Protocol (MCP) patterns, enabling automated conversational query resolution and reducing content delivery latency by 40%.
- Established an enterprise-wide Design System and optimized Event-Driven Architecture patterns, reducing cross-team development overhead by 30% while ensuring high-availability data flows across RESTful and WebSocket integrations.

09/2019 – 09/2020
Vietnam

Vincere.io

Senior Web Developer

- Architected scalable backend microservices (Node.js, ReactJS) for a high-volume recruitment CRM serving 2K+ global recruitment firms, ensuring seamless data synchronization across candidate pipelines with zero system degradation under peak load.
- Led integration of AI-driven parsing and recommendation engines (CoPilot), automating candidate data entry and accelerating candidate-to-role matching speed by 5x—reducing average placement cycle from 14 days to 3 days.
- Migrated legacy monolith to cloud-native multi-tenant infrastructure with advanced Role-Based Access Control (RBAC), establishing a unified high-availability platform achieving 99.9% uptime SLA for global recruitment

GraphQL | PostgreSQL | Elasticsearch

ADVANCED FRONTEND

- React 19
- Next.js
- Angular
- Webpack Module Federation
- Micro-frontends
- State Management (Redux)
- Core Web Vitals Optimization

METHODOLOGIES & GOVERNANCE

- Agile / Scrum
- TDD Test-Driven Development
- CI/CD Automation
- FinOps Cloud Financial Ops
- AI Guardrails
- Data Privacy Compliance (PII)

operations.

12/2018 – 08/2019
Vietnam

Spirit Labs

Full Stack Engineer

- Spearheaded engineering of decentralized applications (DApps) and secure wallet integrations on Ethereum and EOS protocols, processing 500+ daily transactions with zero security incidents across 8 months of production operation.
- Developed and audited 15+ smart contracts, implementing rigorous security mitigation strategies including formal verification and penetration testing to protect distributed ledgers against transactional vulnerabilities.
- Bridged Web3 backend infrastructure with Web2 interfaces via React Native and Node.js, delivering sub-100ms mobile and web experiences while maintaining zero-regression deployment cycles through strict TDD (95%+ test coverage).

08/2017 – 12/2018
Vietnam

ekino Vietnam

Frontend Developer

- Architected responsive single-page applications (SPAs) using ReactJS and AngularJS for global enterprise clients including major French media and e-commerce brands, integrating with 20+ backend microservices via RESTful APIs.
- Optimized front-end rendering pathways and implemented aggressive caching strategies, reducing page load latency by 45% and improving end-user engagement metrics by 22% across omnichannel platforms.
- Implemented CI/CD pipelines within Agile delivery pods, automating testing and deployment to achieve zero-downtime releases for applications serving 500K+ monthly active users.

04/2016 – 08/2017
Vietnam

Ministry of Natural Resources and Environment

Junior Web Developer

- Engineered the foundational data architecture for the Multi-Purpose Land Information System (MPLIS), migrating 50K+ unstructured physical land registries into a centralized relational database serving 12 provincial administrative nodes.
- Designed complex querying schemas supporting multidimensional demographic tracking, enabling automated statistical reporting that reduced manual record analysis time by 70% for government auditors.
- Developed secure data-sharing protocols between provincial networks and central ministry infrastructure, contributing to national e-government interoperability standards and laying the foundational data pipelines for future geospatial AI integration.

CREDENTIALS & ACADEMIC

Carnegie Mellon University
Joint Program with Van Lang University
Bachelor of Engineering, Computer Software Engineering (2010 - 2016)

Certifications

- **Claude Certified Architect – Foundations (CCA-F)** — ANTHROPIC EDUCATION
- **Microsoft Certified: Agentic AI Business Solutions Architect** — MICROSOFT
- **Microsoft Certified: Fabric Analytics Engineer Associate** — MICROSOFT
- **AI Workplace Proficiency Certification** — SUPERHUMAN
- **Microsoft Certified: Dynamics 365 Business Central Functional Consultant Associate** — MICROSOFT
- **Microsoft Certified: AI Transformation Leader** — MICROSOFT
- **Google Certified Educator Level 2** — GOOGLE FOR EDUCATION
- **Google Certified Educator Level 1** — GOOGLE FOR EDUCATION
- **Gemini Certified University Student** — GOOGLE FOR EDUCATION
- **Gemini Certified Educator** — GOOGLE FOR EDUCATION
