PROFESSIONAL SUMMARY

Certified AI-First Solution Architect with 10+ years of experience designing and deploying highly scalable, fault-tolerant enterprise systems across global cloud environments (GCP, AWS). Specialized in architecting Agentic AI workflows, RAG pipelines, and low-latency microservices that bridge advanced machine learning capabilities with measurable organizational ROI. Proven track record of reducing infrastructure costs by up to 35%, optimizing inference latency by 60%+, and leading teams to implement strict data privacy, RBAC, and Human-in-the-Loop (HITL) governance frameworks. Holder of elite 2026 credentials including the Claude Certified Architect — Foundations (Anthropic) and Microsoft Certified: Agentic AI Business Solutions Architect.

AI & AUTOMATION

- Agentic OS
- RAG (Retrieval-Augmented Generation)
- Vector Databases (Pinecone)
- LangChain
- LlamaIndex
- Model Fine-Tuning (LoRA)
- Prompt Engineering
- Anthropic / OpenAI APIs
- OpenAI

PERFORMANCE & MLOPS

- Rust (kornia-rs)
- Python (PyTorch)
- PyTorch
- Vertex AI
- TensorRT
- Model Drift Detection
- Inference Latency Optimization
- GPU Workload Shaping

CLOUD INFRASTRUCTURE

- GCP (Google Cloud Platform)
- AWS
- Kubernetes (GKE)
- Docker
- Anthos (Service Mesh)
- Istio
- Argo Workflows
- High Availability (HA)
- Disaster Recovery (DR)

PROFESSIONAL

EXPERIENCE

01/2026 – Present
Ho Chi Minh City, Vietnam

Independent Consulting

Consulting AI Architect

- Delivered commercial-grade Agentic AI and RAG architectural blueprints for enterprise clients, defining integration patterns across GCP and Azure.
- Engineered production-grade RAG pipelines processing 50K+ document chunks with vector database integrations (Pinecone, Milvus), establishing standardized Human-in-the-Loop (HITL) safety patterns and Model Context Protocol (MCP) tool orchestration.
- Designed end-to-end Agentic AI workflows incorporating FinOps cost governance, SOC 2-aligned data residency controls, and automated threat modeling—optimized to reduce enterprise cloud spend by up to 25%.
- Core Technologies: RAG Architecture, Agentic Workflows, Milvus, Pinecone, GCP, Azure.

01/2023 – 11/2025
Ho Chi Minh City, Vietnam

CADDi

Senior Full Stack Engineer

- Resolved bottlenecks in the industrial design process by architecting a high-performance similarity search system that enabled real-time geometric analysis across 3M+ complex manufacturing drawings.
- Ensured enterprise reliability by designing fault-tolerant, event-driven microservices for data extraction, achieving a 99.95% uptime SLA across 12 production services.
- Optimized AI inference models and strategic GPU workload shaping to resolve high computational overhead, driving a 60% reduction in latency and saving ~$180K annually in cloud infrastructure costs.
- Accelerated development cycles by leading a micro-frontends migration that reduced build times by 40%, simultaneously deploying secure AI context planes incorporating Human-in-the-Loop (HITL) safety guardrails.
- Core Technologies: Rust, Python, PyTorch, OpenCV, TensorRT, GCP, Kubernetes, Anthos Service Mesh, Cloud Pub/Sub, Webpack Module Federation.

09/2020 – 08/2022
Singapore

Kydon Group

Front End Lead

- Spearheaded the core infrastructure for an intelligent, adaptive learning platform, orchestrating multi-agent AI systems that dynamically generated personalized learning pathways for 10K+ concurrent enterprise learners with sub-200ms response times.
- Engineered backend services linking enterprise knowledge bases via semantic API integrations, establishing architectural patterns analogous to modern Model Context Protocols (MCP).
- Established an enterprise-wide Design System and optimized Event-Driven Architecture patterns, reducing cross-team development overhead by 30% while ensuring high-availability data flows.
- Core Technologies: React, TypeScript, Semantic APIs, RESTful APIs, WebSockets, LLM Resource Schedulers.

09/2019 – 09/2020
Vietnam

Vincere.io

Senior Web Developer

- Orchestrated scalable backend microservices for a high-volume recruitment CRM serving 2K+ global recruitment firms, ensuring seamless data synchronization across candidate pipelines with zero system degradation under peak load.
- Led integration of a proprietary machine-learning recommendation engine (internally dubbed 'CoPilot'), automating candidate data entry and accelerating candidate-to-role matching speed by 5x—reducing average placement cycle from 14 days to 3 days.
- Migrated legacy monolith to cloud-native multi-tenant infrastructure with advanced Role-Based Access Control (RBAC), establishing a unified high-availability platform achieving 99.9% uptime SLA for global recruitment operations.
- Core Technologies: Node.js, React, Cloud-Native Infrastructure, RBAC, Microservices.

12/2018 – 08/2019
Vietnam

Spirit Labs

Full Stack Engineer | Distributed Systems & Security

- Pioneered fault-tolerant distributed system architectures across cryptographic networks, guaranteeing safe decentralized data handling for 500+ daily transactions with zero security incidents.
- Conducted rigorous formal verification and penetration testing on 15+ cryptographic protocols, establishing advanced access control boundaries essential for preventing data leakage and injection vulnerabilities.
- Bridged distributed backend infrastructure with responsive mobile/web interfaces (sub-100ms latency), maintaining zero-regression deployment cycles through strict test-driven development (95%+ coverage).
- Core Technologies: Node.js, TypeScript, Distributed Systems, Cryptography, Formal Verification, TDD.

BACKEND & INTEGRATION

- Node.js (NestJS, Fastify)
- TypeScript
- Event-Driven Architecture
- Cloud Pub/Sub
- RESTful APIs
- Semantic APIs
- GraphQL
- PostgreSQL
- Elasticsearch

ADVANCED FRONTEND

- React 19
- Next.js
- Angular
- Webpack Module Federation
- Micro-frontends
- State Management (Redux)
- Core Web Vitals Optimization

METHODOLOGIES & GOVERNANCE

- Agile / Scrum
- TDD Test-Driven Development
- CI/CD Automation
- FinOps Cloud Financial Ops
- AI Guardrails
- Data Privacy Compliance (PII)

08/2017 – 12/2018
Vietnam

ekino Vietnam

Frontend Developer

- Developed responsive single-page applications (SPAs) for global enterprise clients including major French media and e-commerce brands, integrating with 20+ backend microservices.
- Optimized front-end rendering pathways and implemented aggressive caching strategies, reducing page load latency by 45% and improving end-user engagement metrics by 22% across omnichannel platforms.
- Implemented CI/CD pipelines within Agile delivery pods, automating testing and deployment to achieve zero-downtime releases for applications serving 500K+ monthly active users.
- Core Technologies: React, Angular, CI/CD, Agile/Scrum, RESTful APIs, SPA Architecture.

04/2016 – 08/2017
Vietnam

Ministry of Natural Resources and Environment

Junior Web Developer | Data Systems Engineer

- Engineered a massive data ingestion pipeline for the Multi-Purpose Land Information System (MPLIS), structuring 50K+ highly complex, unstructured datasets into a centralized relational framework serving 12 provincial nodes.
- Designed complex querying schemas supporting multidimensional demographic tracking, enabling automated statistical reporting that reduced manual record analysis time by 70% for government auditors.
- Developed secure data-sharing protocols connecting provincial networks to central infrastructure, establishing the foundational data prerequisite required for modern geospatial pattern recognition.
- Core Technologies: Relational Databases, SQL, Data Ingestion Pipelines, Geospatial Data.

CREDENTIALS & ACADEMIC

Carnegie Mellon University

Joint Program with Van Lang University
Bachelor of Engineering, Computer Software Engineering (2010 - 2016)

Certifications

- Claude Certified Architect – Foundations (CCA-F) — ANTHROPIC EDUCATION
- Microsoft Certified: Agentic AI Business Solutions Architect — MICROSOFT
- Microsoft Certified: Fabric Analytics Engineer Associate — MICROSOFT
- AI Workplace Proficiency Certification — SUPERHUMAN
- Microsoft Certified: Dynamics 365 Business Central Functional Consultant Associate — MICROSOFT
- Microsoft Certified: AI Transformation Leader — MICROSOFT
- Google Certified Educator Level 2 — GOOGLE FOR EDUCATION
- Google Certified Educator Level 1 — GOOGLE FOR EDUCATION
- Gemini Certified University Student — GOOGLE FOR EDUCATION
- Gemini Certified Educator — GOOGLE FOR EDUCATION
